Flexi Fix Pack

To complement our range of Flexi Feet, we have created two versions of fix packs. These come as either a spring nut or T-bolt option. Each pack contains bolts, washers and nuts to secure a single ASHP condensing unit to a pair of feet.

Install +

Anti-Vibration Mounting Bolts

The anti-vibration mounting bolts are in a convenient pack of 4. Each pack can be used with the Pump House wall brackets and is used as a method to absorb the vibrations generated by an ASHP or condensing unit.

Easy-Fit

Floor Tray Mounting Bracket Kit

When units are mounted at floor level, condensate discharge needs to be directed towards a drain or soakaway to avoid condensate causing a slip hazard.

This floor bracket kit allows the metal tray to be mounted onto a flexi foot kit or flexi lite slab and foot kit. The ASHP can then be mounted onto the top of the bracket.
