

# Salamander Pumps

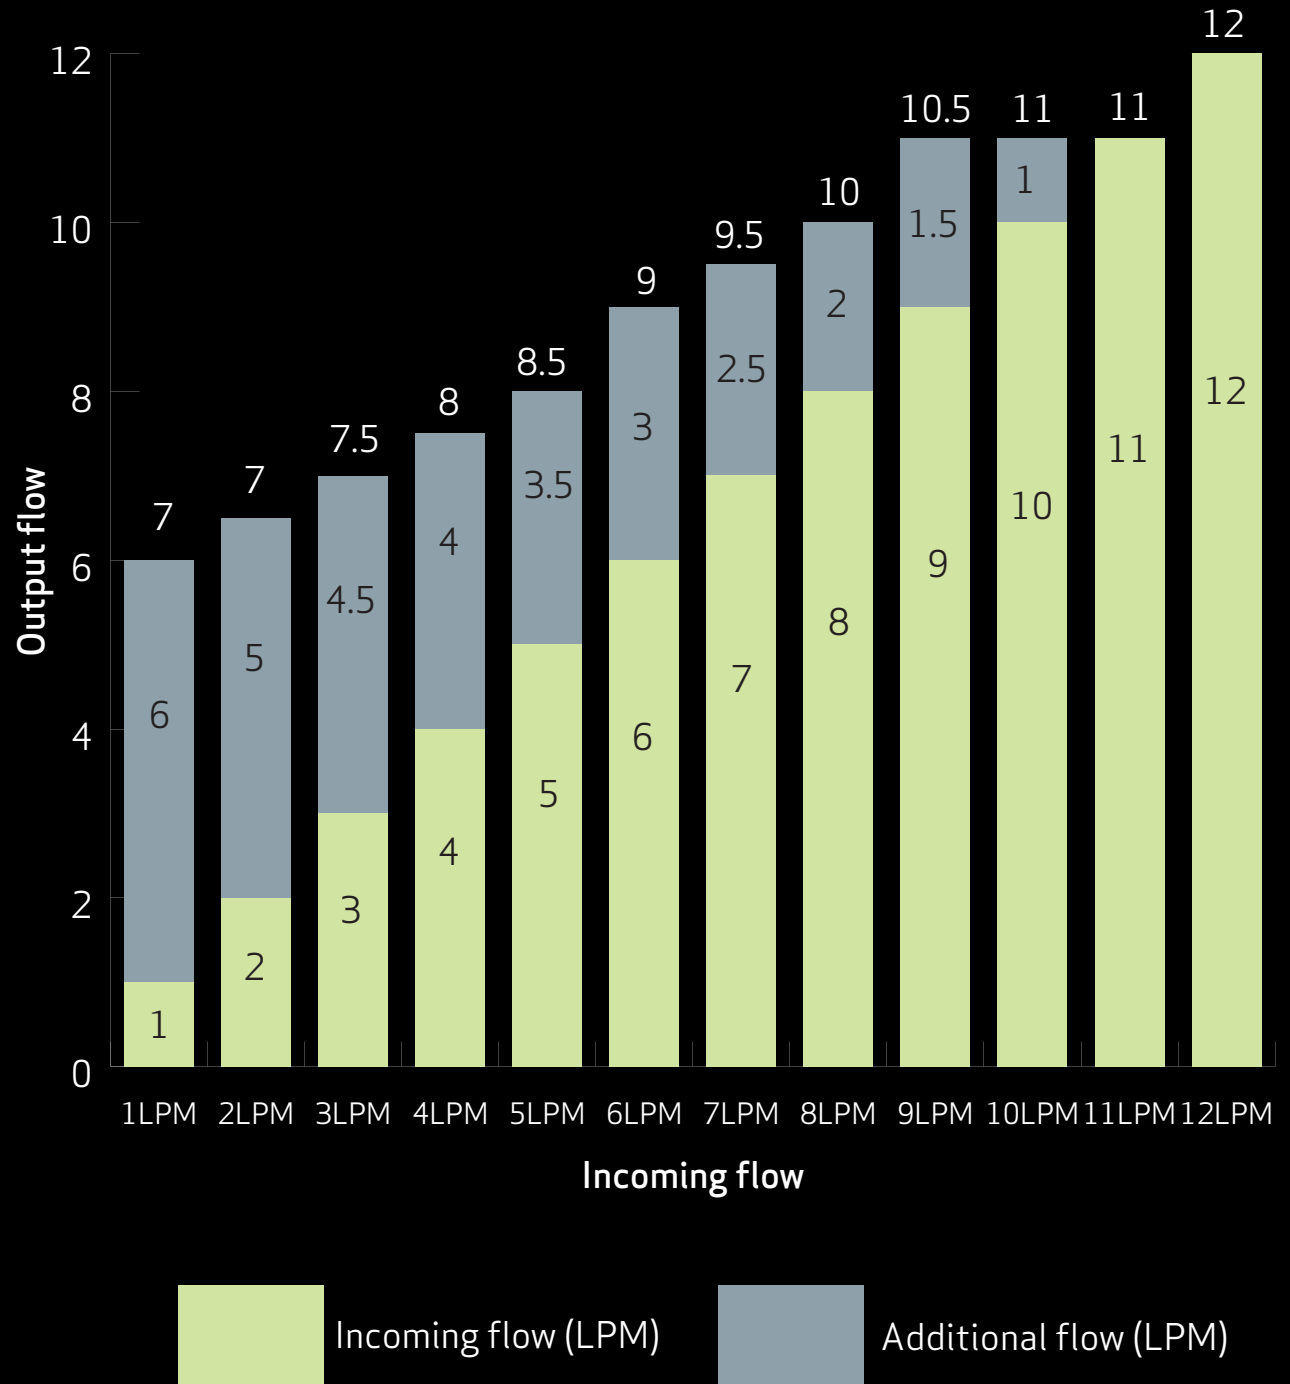

## TapBoost

### Output flow compared to input flow

TapBoost improves the water flow to a single outlet to between 7 and 12 litres per minute (LPM), depending on the flow rate coming into the pump.

The graph to the right illustrates the additional flow TapBoost will deliver based on the natural incoming flow rate.

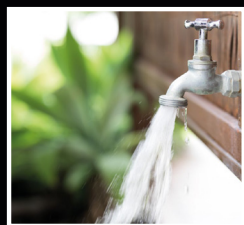

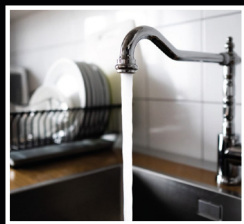

# Salamander Pumps

## Boost water flow with TapBoost

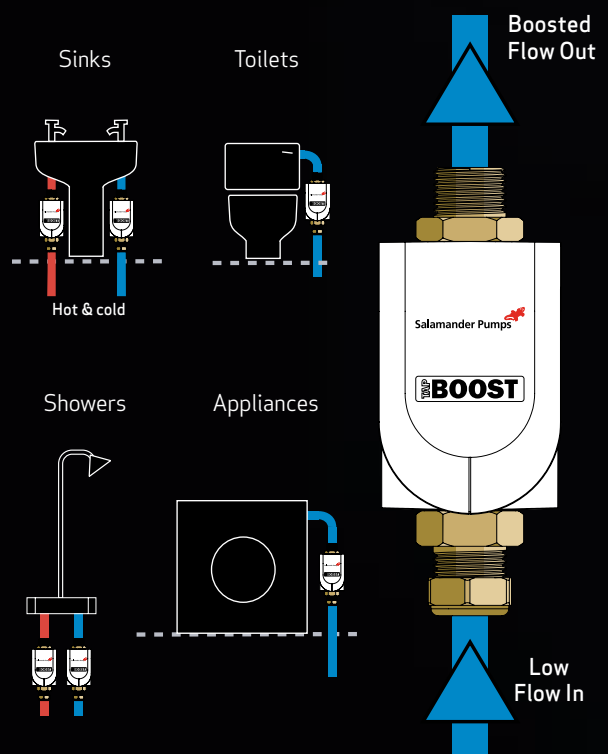

This easy to install inline pump will boost the water flow to a single outlet to 7-12 litres per minute, depending on incoming flow.

Perfect for a faster flow or fill to:
