

BPV100

Automatic Bypass Valve

The BPV100 opens only when the system pressure dictates. This will increase the system efficiency as well as eliminating any system noise. A lot of boiler manufacturers demand that the circulation of water through the boiler heat exchangers should not fall below a certain limit, regardless of system load. The BPV100 will open and close to suit the system. The BPV100 is pressure operated.

Characteristics

- Improves efficiency
- Cuts out system noises
- Maintains flow rates
- Perfect for low water content systems
- Available in 22mm only
- 2 year warranty

Features

Product	Automatic Bypass Valve
Max. supply	230V AC
Dimensions (mm)	105 x 50 x 22
