accessories	38
technical specification	44

Lifeshield uses the very latest nano technology to deliver a unique bond with the glass that leaves the surface totally smooth and able to resist the build up of unsightly limescale and soap deposits which can lead to glass looking less than perfect. Totally clear UV stable and extremely durable, Lifeshield won't peel or flake and unlike some other systems you don't need any specialist cleaners or top up products to maintain it's dirt repellent properties.

- All measurements, colours and descriptions are given as a guide only

ZONE bath screen

The Sensations Zone bath screen gives you the best of both worlds effectively turning your bath into a shower tray. It's unique curved bottom edge puts safety first in the slippery and often cramped environment of a typical bathroom.

Built in towel rail, larger than average dimensions making it ideal for the increased performance of modern showers and double seal for double protection against water leakage.

- 5mm toughened safety glass
- Unique curved bottom edge for increased safety
- Increased height & width
- Suitable for high performance showers
- Built in towel rail

See page 57 for specification.

---------	--	---------------

See page 64 for specification.

The Sensations plinth allows the shower tray to be elevated from 110mm to 135mm to give easy access to the plumbing. It is a steel frame on adjustable feet for ease of levelling topped with a plywood baseboard creating a solid foundation. It is complete with a template and panel supporting blocks. When set at 110mm the moulded fascia panel fits under the tray. When set higher, a surface mounted flexible flat panel is available.

Overall Height (Including Fixing Kit) - 1996mm					

All panels are unhandled and can be installed to give left-hand and right-hand access.
 For clarity purposes, only right hand access configurations are shown, where applicable.
 All glass panels are supplied complete with a factory-fitted bottom protective clear trim and a glass-to-glass corner joint seal.
 This dimension is based on using the standard 1000mm long stabiliser rail in the front & side panel component packs.
 This dimension can be increased by a further 500mm by using the special 1500mm long stabiliser rail, WWB-ZEN150, purchased separately.
