

PremierPack

Don't leave without one.

Make sure you always install Alpha InTec combination and system boilers using the PremierPack wall-mounting jig.

Fit PremierPack for long-term peace of mind

PremierPack automatically adds an extra two years to the boiler's standard guarantee, giving you and your customers unparalleled peace of mind.

Fit PremierPack for built-in pump protection

PremierPack incorporates the Alpha Cyclone device which uses centrifugal force to remove debris from the heating system. This significantly reduces instances of boiler failure caused by damage to the pump.

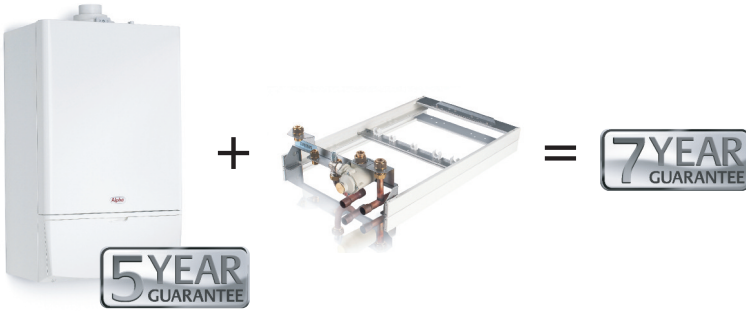

Fit PremierPack for a quicker, easier and neater installation

- Split flow tails for piping from above
- Pipe clip plate with variable fixing points
- Pre-cut copper earth bonding plate
- Pipe cover tray
- PRV pipe terminal

Alpha
HEATING INNOVATION

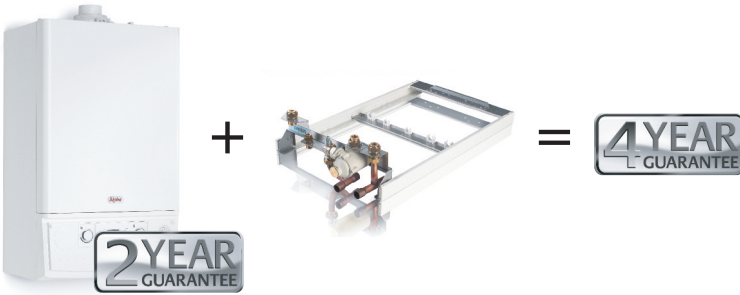

InTec C combination boilers - 26C, 30C & 34C

InTec boilers can make a serious impact on energy bills:

- Increased 1:8 modulating range means reduced gas consumption
- Improved NO_x ratings
- Low electrical consumption in operating and standby mode

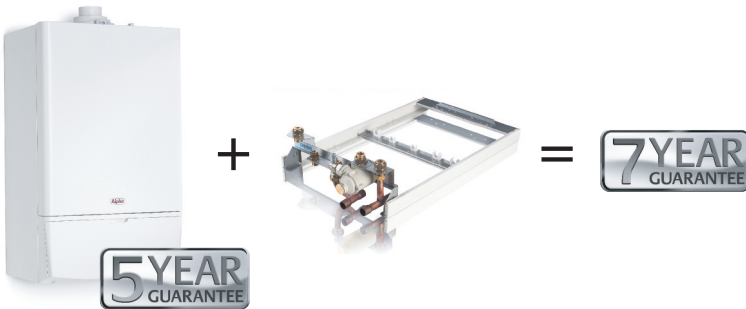

InTec X combination boilers - 24X and 28X

They come with a host of features including:

- Compact dimensions (720x440x300mm)
- Factory fitted valves and tails
- Stainless steel heat exchanger
- Frost protection and daily pump kick
- Grundfos pump and hydroblock assembly
- LCD display on control panel
- Detailed fault codes
- Easy access NTCs on front of pipes

InTec S system boilers - 12S, 18S & 28S
