## Valor's established history helps to develop the future

Valor constantly devotes time and energy into improving the way we do things and investing in the future. We have a dedicated team of experts in their field, who use a mix of time honoured methods and modern techniques to develop and innovate the products of the future.

And because we understand our products from start to finish, you can be sure they conform to the best quality.

Our focus on innovation doesn't stop at our factory gates, our team work with industry bodies to help guide the way the industry performs, to ensure that products are fit for today's needs but are also designed to meet challenges of the changing environment in which we live.

Before you start...

# We understand that the process of buying your fire can be overwhelming.

With the many advancements in fire technology it is easy to get confused. We have laid out the Valor range options in an easy to view matrix, so you can compare the product offers and pick the one perfect for you and your home.

Generally fires are powered by mains gas, LPG, electricity or solid fuel, the options for selecting a fire may start here. If like many homes in the UK you have access to Gas, electricity and solid fuel, your next consideration is likely to be the availability of a chimney or flue.

## Chimney Types

Look at the pictures and decide which one best matches the chimney at your home then, when you're reading through our brochure and find a fire you like, simply check it's suitable for the chimney at your property.

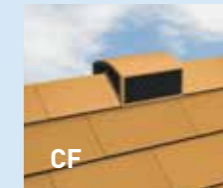

Brick Chimney

Suitable for all fires. The classic brick-built chimney can handle fires with a deep bed right through to shallower slimline styles.

Pre-fabricated flue

Suitable for most fires. Pre-fabricated flues are deep enough to take most of the deep models and all of the slimline styles.

Pre-cast flue

Suitable for a wide range of slimline fires. A number of deeper fires can be adapted for pre-cast flues with the use of a spacer kit.\*

No Chimney

Even if you have no chimney or flue we have a selection of fires for you.

\* Please note - some remedial building work may be required, please consult your builder or contact the technical team on the number at the back of the brochure.

## Controls

### Manual

- Rocker switches
- Twist
- Buttons

### Fireslide

Turn on/off or up/down from easy to use sliding control.

### Remote

Control from the comfort of your armchair. Available on some gas, electric and Dimension models.

## Activeheat™

Fires with Activeheat™ give out radiant heat but also draw in cold air from the room, pass it through a heat exchanger to warm it up and then circulate it back around the room. The result is that the room is heated much faster than by radiant heat alone.

## High Efficiency

Valor have a range of products that lead the way in the effective use of energy - good news for the environment and great news for you as this means they are cheaper to run.

### Gas Collection

Our Homeflame range is 38% cheaper and 89% efficient. With the shallowest slimline on the market they are universally\* applicable.

### Electric Collection

- 100% at point of use
- LEDs - less energy consumed
- Regulators switch off heat output when room temperature is achieved

### Stoves Collection

- 80% efficient
- Wood burning is carbon neutral
- Technology that helps secondary combustion and burns less fuel

\* Flue boxes can vary. Always check with a qualified installer prior to purchase.

Valor Homeflame fires are the most energy efficient, chimney installed living flame fires on the market, with models available for any chimney or flue.

With full depth and slimline models available, Valor Homeflame boasts the slimmest high efficiency fire available on the market, allowing any home in the UK to specify an attractive fire safe in the knowledge it is kinder to the environment.

Impressive heat outputs and exceptional efficiency ratings of upto 89% nett, Homeflame fires are not only gentler on the environment but as they are cheaper to run, they are kinder to your pocket too.

Valor Fires was presented with a Queens Award for Enterprise: Innovation in 2009 for the Homeflame fire range; which was designed to reduce carbon emissions and running costs through market leading high efficiency.

The Queen's Awards for Enterprise exists to champion the UK's most enterprising, creative and sustainable organisations. The awards celebrate the successes of British business and the vital importance of enterprise and innovation to the economy.

## Homeflame Dream offers 89% efficiency

The Homeflame Dream is a more traditional style of fire available in a range of finishes to suit any living space. Impressive heat output and coal effect fuel bed creates the look and feel of a real fire. Easy to operate with Fireslide control positioned at the top of the fire requires little effort to ignite and adjust the fire setting.

## The traditional Dream with modern technology

New technology combines the benefits of efficient heating with the traditional Dream look to create a stunning glass fronted fire suitable for all chimney and flues. With an inset depth of just 79mm it is the slimmest HE inset living flame fire available. Impressive heat output, Fireslide control, reflective sides, choice of colours and coal effect fuel bed make this the obvious choice in terms of style and usability.

Dream Balanced Flue shown in gold plated finish

## Enjoy the fire of your dreams

The Dream Convector offers both a radiant heat and activeheat through the means of convection by drawing cold air in from the room, passing it through a heat exchanger to warm it up and back out in to the room providing exceptional heat output. The slimline version allows modern homes with shallow flues to enjoy those classic dream looks.

## Stylish and efficient, and perfect for homes without a chimney

Now you can have the classic Dream looks and the delightful dancing flames in homes without a chimney. Also, Dream balanced flue offers an impressive 84% efficiency and 2.8kW heat output.

## Bringing that warm homely feeling to any interior

Clean lines and minimal detail make the Decadent a suitable fire design for most interiors. The Decadent range comes in a brass or chrome finish to suit all interiors.

With the Decadent Balanced Flue homes can bask in the warm glow of realistic flickering flames. Perfect for those who want the comfort and homely feel of a gas fire, but do not have a chimney or flue.

## Destined to be the focus of attention in any room

Designed for either hole in the wall or hearth mounting, making it a suitable choice for a smaller living space. Available in silver finish with a pebble effect fuel bed or champagne finish with a coal effect fuel bed whilst offering an impressive heat output.

# Spanish Basket

# Majestic Fire Basket

Majestic shown in black finish with pebble fuel bed

## Beautifully designed fire

The Majestic is a stylish Decorative Gas Fire (DGF) that provides almost endless interior design options - a coal or pebble fuel bed, and black or brass and black fire fronts.

DGFs, can be used in large chimney openings to create a realistic open fire look as unlike inset fires, they consist of just the fire basket, without the "box" unit surrounding it, giving all the charm and mesmeric appeal of a real fire without the hassle.

Firelite

## High performance from an old favourite

The Brava is a favourite within the gas fire range offering high efficiency and excellent heat output. With a choice of teak or mahogany top and side panels to fit into your living space. The Brava controls have been developed with ease in mind - there is a choice of the standard twist top control or, for effortless control, the Fireslide option.

## Exceptional reliability and easy operation

The Firelite's white ceramic radiants ensure a truly impressive performance. The Firelite offers a cost effective heating option that doesn't compromise on standards of style, reliability and performance, making it an ideal choice.

An electronic ignition variant is also available making the fire incredibly simple to operate.

**Electric.**  
**As you've never known it.**

**The only true real fire effect from an electric fire, Valor Dimension is available in standard or super slim models, making it easy to install anywhere.**

The crucial elements of a real fire have been replicated; glow, so that the fire communicates warmth; authentic flame effect, providing colour and movement and fuel-effect depth.

It's a totally new way of enjoying the atmosphere and magic that only a real fire can create – at the press of a button.

The innovative new Baxi Bermuda BBU HE is the only high efficiency BBU in the UK. And it's the easiest way to replace an existing BBU. An integral part of the BBU HE solution is the Valor Dimension(TM) range of back boiler fires. Please visit [www.baxi.co.uk](http://www.baxi.co.uk) for more information.

### Further Information

Valor Dimension fires have been designed to look at their best when fitted flat against a wall. Many fire surrounds have a 3" spacer that helps to make sure the fire is perfectly positioned when it is installed with the spacer provided with the fire. If your fire surround doesn't have this space (or if you don't have a fire surround), we can provide an additional spacer kit (part number 0584081) to help you to position the fire perfectly.

## Traditional fire with elegance

Dream's traditional stance combines elegance with grandeur to create a simplified design with a regal signature. A high quality fire, it showcases cutting edge technology and abiding beauty - from its solid cast iron fascia with plating, to the faithful finishing and hand craftsmanship. Truly a fire to captivate.

Dimension Lyrica

## Aesthetic appeal with functionality

The Lyrica design takes reference from traditional firedogs and incorporates them into the free-standing fret design, to combine aesthetic appeal with functionality. It creates an imposing feature that establishes a sense of tradition without excessive intricate detailing. The heavy cast fret exudes quality and the sense of permanence you would expect from a traditional brass fire.

## Why choose Valor Hydroflame?

Hydroflame fires are installed into the main central heating system, rather than a stand-alone appliance.

### The benefits of Hydroflame include -

- Only one heat source in the room
  - This avoids doubling up or wasted heat use
  - Saves space – giving you more flexibility to style a room
- Low running costs – less than £6 per year
- Provides an instant heat boost when the central heating is switched off
- Valor Dimension® - uses the latest technology to create the most authentic 'real' fire effect.

For technical details see page 73.

Brunswick

## Intricate detailing

The intricate detailing on the Ridlington stove, perfectly houses the real fire within. The stove comes with a choice of brushed brass or brushed steel door furniture, and has a heat output of 8.0kW. Controlled airwash system aids combustion and helps keep the glass clean.

### Further Information

**Wood burning is carbon neutral**  
No more carbon is released when wood is burned than the tree has absorbed from the atmosphere during its lifetime.

**Wood is a renewable energy source**  
More stable in supply and less effected by shortages, which means fewer surprises in fuel bills. Valor's wood burning stoves are more than 76% efficient:

- 20% more efficient than standard stoves
- 50% more efficient than an open fire

**Greater efficiency means less fuel and fewer trips to the wood shed**

**Valor's air-washed glass system increases secondary combustion:**

- Cleaner glass
- Cleaner chimney
- Cleaner environment

## Compact and simple

The comfort of a real fire housed in a traditional style stove. Best quality cast iron solid fuel stove, suitable for logs, coal and peat. The Brunswick stove comes with a choice of brushed brass or brushed steel door furniture. Controlled airwash for cleaner glass and aids combustion.

Arden

## Time honoured tradition

A traditional, double door design stove, Hamlet is easy to use and easy on the eye. Be it a mild autumnal day or a chilling mid winter freeze, you can be sure of a comfortable warmth radiating around the room from this UK steel manufactured stove.

### Further Information

**Cast or steel?**  
Stoves are manufactured in either steel or cast and both have their benefits.

Cast stoves hold their heat, therefore radiating an even temperature whilst the stove is in use, and offer more control over the heat output.

**UK Produced**  
The steel bodied UK produced models offer the benefit of impressive heat outputs for their compact proportions, heats rooms promptly and due to the nature of steel are very durable and resistant to damage.

## Solid design with traditional detailing

For homes that want the benefit of a real fire, the Arden is compact enough that most living spaces would be able to accommodate. Best quality UK steel solid fuel stove, suitable for logs, coal and peat.

**Important notice:** All dimensions stated within the specification table are intended as guidance only. Please consult installation instructions before commencing any building work. The right to change specification without prior notice is reserved. No liability is accepted for problems caused by poor installation or misuse of product.

Key to technical table

**GL&W** - Can be ground level or wall mounted - ashpans is not separate.

**Plinth** - Can be ground level or wall mounted. If wall mounted the fire would require a small plinth to support the ashpans which is not attached to the main fire.

\* Spanish Basket may require a plinth depending on the depth of the opening.

**NB:** Most of the fires installed with the requirement of a 'Plinth' are primarily intended for ground level installation with a back panel and hearth. If raised some of the inner workings may become more visible than intended.

† Due to the sheer number of varying flue boxes and pre-cast flues it is not possible to advise on which fires are suitable until the existing fire has been removed. If the width at the rear of the pre-cast flue starter blocks is less than 300mm wide the minimum depth of the opening will be not less than 154mm.

> Balanced flue fires can be installed inset/semi-inset into the wall cavity with the 3" spacer, or flat against the wall with the 5" spacer.

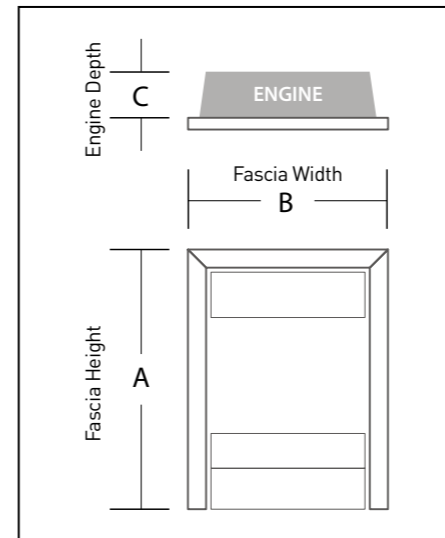

\* Indicates appliance depth.

Key to dimensions

Rebated Surround

Using a rebated surround is the simplest and most discrete way to create extra space away from the wall if required. Rebated surrounds have a smaller return on both legs and top panel, allowing the back panel to sit further forward.

For details and to view our products at your local dealer phone: **0845 871 1565** or visit our website [www.valor.co.uk](http://www.valor.co.uk)

Quality

Every single fire manufactured at our purpose built factory in Erdington is tested for your peace of mind. Our products are manufactured in accordance with the internationally recognised Quality Management Standard ISO 9000:2001.

Gas Safety

All our fires are fitted with a flame safety device, which cuts off the gas in the unlikely event that the pilot flame is blown out, and our Oxysafe system, which monitors the level of oxygen in the room and cuts off the fire if there is insufficient oxygen present.

All gas appliances must be installed by a competent Gas safe Registered Installer and in accordance with the manufacturer's installation instructions and they should not be fitted directly onto a carpet or floor of combustible materials. Please note that certain parts of the appliance will become hot. A suitable guard is therefore recommended where the very young or infirm are concerned.

heateam - Expert aftercare service you can rely on!

We are so sure of the quality of our fires that in the unlikely event of any mechanical problems during the warranty period we will send out one of our expert **heateam** engineers to rectify the problem free of charge\*.

**heateam** is the service division of Valor. Our aim is to keep Britain warm by offering free Aftersales support to customers during the warranty period, as well as providing a range of out of warranty services. Based in Warwick, our in-house customer contact centre is open 363 days a year. We have a dedicated and skilled team on hand to help you with any enquiry. So when you use heateam, you know that you are in good hands.

- **heateam** only supports Baxi Group appliances, so all heateam engineers are experts in caring for Valor products
- **heateam** offers a nationwide coverage and has over 280 Gas Safe Registered heateam engineers.
- **heateam** only uses official Valor spare parts - quality and safety are always our prime concern.
- **heateam's** award winning top 50 UK Call Centre is open 7 days per week, 363 days per year.

To contact **heateam** call: **0844 871 1545**. **heateam** is open Monday - Friday, 8am - 6pm weekdays, and from 8.30am - 2pm at weekends. On Bank holidays we are open from 8.30pm - 2pm and closed on Christmas Day and Boxing day.
