

MICRO BOARD

NEW From
MYSON FLOORTEC

The small board that gives you more.

The flexible underfloor heating system ideal for renovations and new build projects.

NEW from **MYSON FLOORTEC**, **MICROBOARD** is a retrofit, low profile underfloor heating system. It can be installed over an existing floor, or as part of a new build project, making it our most flexible fixing system yet. At only 18mm in depth, it allows underfloor heating to be easily installed in older and existing properties, without the need for expensive and disruptive excavation.

Return panel

Technical Information

Straight panel

Board Length:	1200mm
Board Width:	600mm
Board Thickness:	18mm
Edge:	Overlap

Return Panel

Board Length:	1200mm
Board Width:	600mm
Board Thickness:	18mm
Edge:	Smooth

Properties

Density:	1150±50 (kg/m ³)
Thermal conductivity:	$\lambda \leq 0,32$ W/(mK)
Minimum compression strength =5 (kPa)	
Airborne Sound (Rw):	28dB
Impact Sound (Ln,w):	86dB
Fire class according to EN 13501-1:	A2 Non-flammable
Specific heat capacity:	1.1 (kJ/kgK)

Underfloor. Over floor.

The **MICROBOARD** system is the perfect solution when heating existing domestic properties. It allows all homes to benefit from the advantages of underfloor heating which has traditionally been reserved for new build projects.

It is available in two panel types which allow for greater flexibility, with straight and end return panels.

Key benefits:

- Easy to install, can be used on ground and upper floors
- Fits easily over most floor types
- Ideal for either renovation or new build
- 1200 x 600 x 18mm
- Integrates with the existing heating system
- 10mm PEXcellent5 pipe is easily laid in the panels
- 10 year Complete System Guarantee
