Spacer Brackets available in Black/White only

For Water Butts & Rainwater Diverters please see page 24

FloPlast recommend the use of lubricant on all gutter seals for ease of fitting and improved performance.

FloPlast CAD drawings

The benefits of CAD drawings are well known by the Architect/Specifier community. Drawings are available to download for each product that FloPlast manufacture. Please visit www.floplast.co.uk and click on the 'links' section.

For your convenience, files are downloadable as either a .dwg (primarily for CAD programs) or as a PDF for easy viewing. All files determine design lengths required by the Architect/Specifier to enable them to produce accurate drawings.
