THE BOLD LOOK
OF **KOHLER**®

Enhancing your home, improving your life

Choosing and planning a new bathroom is an exciting, creative experience. It's a rare opportunity to transform one of the most important parts of your home – where you can relax, refresh and revitalise, and where your daily routine begins and ends.

KOHLER® began designing bathroom products nearly 140 years ago, and we've seen a lot change in that time. In fact, we've been at the forefront of innovation, and our showering products lead the way. From the sleek, award-winning Torsion®, to the highly configurable Minima® NG, we offer a wide range of shower enclosure options.

We've earned a reputation for iconic design and uncompromising quality. With everything from shower doors to shower trays, our wide selection lets you easily upgrade your existing bathroom or custom design a new one.

KOHLER Quality.

Kohler develops, tests and handcrafts shower enclosures that last a lifetime. Through hard work and no compromise, we have built a reputation as solid as every product we create. We're passionate about what we do and proud of our heritage. Yet we're always looking ahead and ready to evolve. We embrace design innovation whilst never sacrificing the quality and craftsmanship of the Kohler brand, since 1873.

HINGE MECHANISM

Minima[®] NG Made-to-Measure

KOHLER[®] invites you to create your own unique showering space suitable for all your needs. Our beautiful glass panels are up to 2 metres wide and 2.4 metres tall; you can build the shower of your dreams or renovate a suitable space. Kohler provides a home measure and installation service to ensure your Minima[®] NG Made-to-Measure door or enclosure is a perfect fit.

Features

- Maximum panel width 2 metres
- Two handle options
- Dwarf wall options
- Suitable for difficult angles and notches
- Home measure service available

Minima[®] NG Made-to-Measure

What is it?

The Made-to-Measure service helps you create the shower of your dreams with a realistic appraisal of the installation and to spot any potential pitfalls up front. Our trained Kohler[®] engineers will be looking for out-of-true walls and varying slopes (including unlevel trays and floors). They will check that the choice and position of any doors or panels is suitable in relation to the whole bathroom layout and that the handing of the door and panel is correct for application. The home measure and installation service can only be undertaken after tiling is complete and the tray is installed and level.

Install

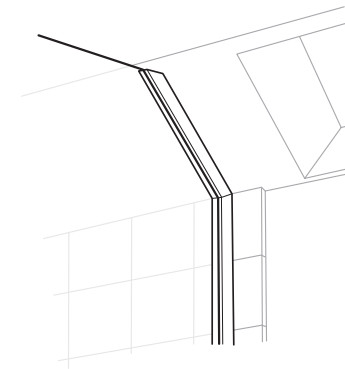

Following the home measure service, if you wish, our engineer will return to install the unit, further ensuring your complete satisfaction. However, please be aware Kohler[®] will only install if we have carried out the survey and measure.

Pricing

Each Made-to-Measure unit is unique and pricing will vary dependent on your requirements. Please use the prices that follow as guidelines and visit your nearest Kohler[®] showroom to discuss your bespoke showering design and gain a better understanding of the prices involved. If you choose the Kohler[®] measuring service the price of this service will be taken off the final unit price, giving you peace of mind at no additional cost.

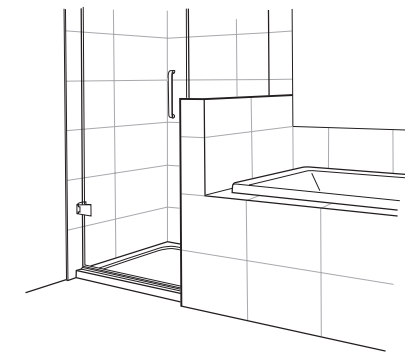

Contact

Logistics and dimensions in your home could mean that not everything is possible given a specific situation. Your retailer can provide guidance on this, or feel free to call us on 0844 571 0048 for further assistance.

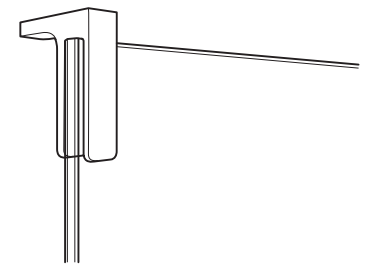

Angle & Notch Cuts

Whether it's an unusual loft space or complex bathroom layout, glass panels and doors can be bespoke to allow for that ideal fit. Angled cuts offer lines that follow the contours of the room and notches ensure no obstructive architecture prevents the perfect showering experience.

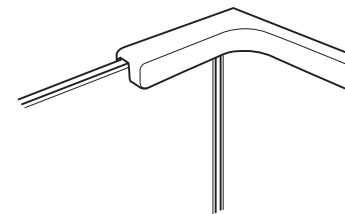

Dwarf Wall

Whether there is a low level wall or bath end, Minima[®] NG Made-to-Measure offers a solution to suit your space. Adapting shower enclosure panels around the constraints of the modern home, this feature allows for an integral showering space or a tiled seat.

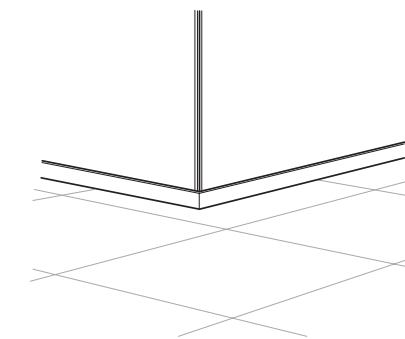

Ceiling Clamp

When the shower enclosure of choice makes a room with floor to ceiling panels, you can feel sure that the unit is fully secured and aesthetically pleasing with this purposeful yet clean-looking solution.

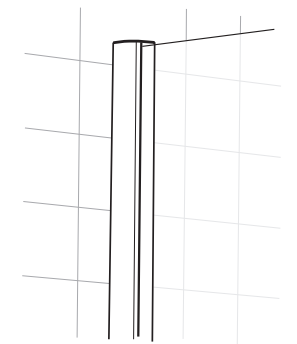

Bracing Bracket

Required for any installation over 2m tall, this bracket adds robustness to extra tall enclosures.

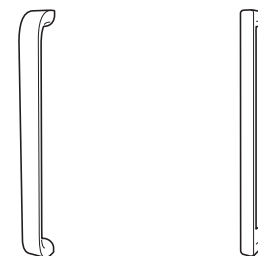

Surface Floor Profile

The most common means of securing your shower enclosure to the floor, these floor profiles join surfaces to glass with a slim, yet sleek aluminum profile.

Surface Wall Profile

The most conventional method of securing your shower enclosure to the wall, these wall profiles connect surfaces to glass.

Handles

Soft or Geometric in profile, the choice is yours.

Choreograph® Freestanding Shower Seat

The Choreograph® seat makes it easier than ever to create a shower space that caters to your needs, your style, and your life. Make your shower time more relaxing with this freestanding shower seat. Its unique height offers optimal comfort for daily grooming tasks, both in and out of the shower.

- Elevates you to the ideal showering position for maximum water pressure and minimal heat loss
- One-piece construction designed for water drainage and easy cleaning
- Can be used inside and outside the shower
- Rated to a static weight of 137kg
- Polypropylene construction
- Anti-slip coating
- Anti-slip feet

Code	Description	RRP Price
97632-0	Choreograph® freestanding shower seat	£249.00

Enclosure Care Kit

Available in one Care Kit, the treatment and protector are used on new or existing shower installations, where protector has not already been applied, and for topping up factory coated glass after a reasonable length of time. The treatment must always be used on existing shower installations to prepare for the protector. The treatment is a cleaning material that is applied to the glass to ensure it is in the cleanest condition possible prior to application of the protector. If this process is not undertaken, there is the likelihood of locking in dust, dirt and stains under the protector.

The Care Kit includes: one bottle of glass treatment, one bottle of glass protector, 4 cloths and 2 rubber gloves.

Nano-technology

- Intelligent particles self-organise to smoothen and stop dirt sticking to the glass

Easy clean

- Makes cleaning effortless. No need for strong cleaning agents

Repels water

- The nano-particles repel water to stop dirt and limescale build-up

Limescale resistant

- The nano-particles fill gaps in the glass so limescale can't grip the surface

Long lasting

- The durability of the agent means you won't have to re-apply frequently

Code	Description	RRP Price
305817	Enclosure Care Kit	£44.00
305818	Glass Cleaner	£21.00
306590	Glass Cleaner & Enclosure Care Kit	£57.00

Bath Screens

Good things come in small packages. When size precludes a separate shower enclosure, bath screens lend big impact to the smallest bathroom. Single panel or discreet folding bath screens mean you are sure to find a look that meets your needs.

Shower Trays

Less is more for our range of low-profile shower trays. Thin yet incredibly strong, their slender lines almost vanish into the floor, complementing modern shower enclosures perfectly to complete the minimalist ideal. What's more, ingenious design and advanced materials help keep cleaning minimal too.

Product Pages

Standard Shower Trays	99
Anti-Slip Shower Trays	101
Low Level Plus Trays	103

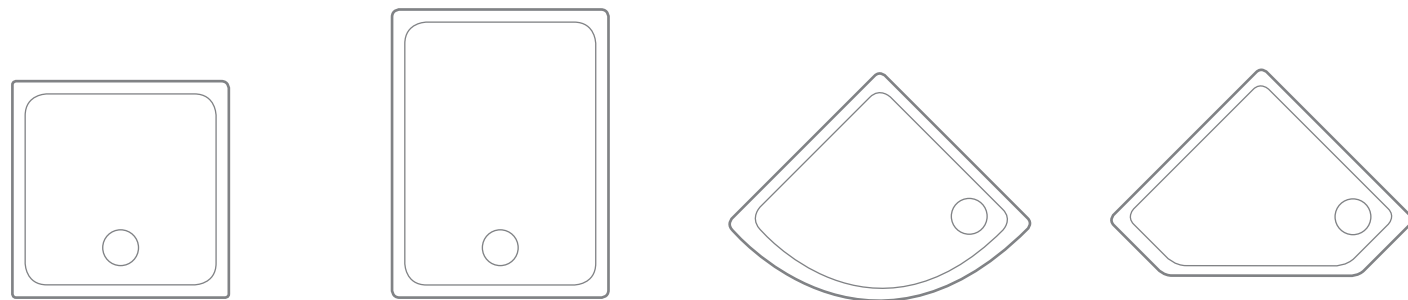

Features

- Choice of Low-Profile, Anti-Slip and Walk-In trays
- Walk-In trays are suitable for use with walk-in enclosures
- BioCote® incorporated to reduce bacteria growth by up to 99.9%
- Tray colour white
- 10 year guarantee
- Anti-Slip is available on all trays except Low Level Plus trays

N.B Amicio shower system shown no longer sold in the UK

Shower Trays – How to Shop

Low Profile Tray

Choose from a range of Low-Profile shower trays to create your minimalist shower enclosure. The 40mm height makes it one of the slimmest shower trays available, giving a sleek almost invisible “wet-room” look. The sleek styling flows through to the waste, which is integrated into the design to give a level surface for you to stand on.

- Low-profile tray with ‘walk-on’ waste
- Patented laminated construction gives incredible strength whilst reducing weight
- BioCote® incorporated to reduce bacterial/mould growth by up to 99.9%
- All trays available with riser kit for easy installation on concrete floors
- Tray colour white
- 10 year guarantee

Riser Kits

A riser kit allows you to convert a low level tray to a riser tray providing the flexibility of installation on a solid floor. Each kit contains easy to install removable panels, simple clip-on fixings and robust adjustable push-fit riser legs.

Riser kit legs provide adjustability to make flat. The height of the tray has to be 100mm from the floor surface to the underside of the tray. The new panel sits under the tray. Numbers on each leg indicate level setting and once height is set, locking nuts ensure no movement.

Technical Details

Height: 40mm
 Rim width: 66mm
 Height on riser: 140mm
 Front surface: Durable Acrylic capped ABS incorporating BioCote®
 Filler: Resin-stone concrete for stiffness
 Rear skin: ABS
 Max flow rate: 30l/m

Clean and fresh forever with innovative BioCote® technology, every low profile tray stays protected for its whole lifetime, thanks to the antibacterial technology BioCote®, which is incorporated into the manufacturing process. This innovative antibacterial technology will keep your new shower tray cleaner than ever before by reducing bacteria and mould growth by up to 99.9%.

anti-slip

Shower Trays

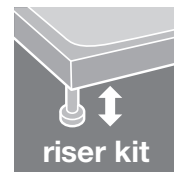

The KOHLER® anti-slip tray is an anti-slip tray like no other. This tray exceeds the most stringent independently tested anti-slip test, passing at – Class C.

- Anti-slip coating is applied to the whole tray surface
- Low-profile 40mm shower tray
- The coating is bonded to the tray for a long lasting finish
- Tray colour white
- Patented laminated construction gives incredible strength whilst reducing weight
- BioCote® integrated into the anti-slip surface which reduces bacteria and mould growth by up to 99.9%
- Easy to clean
- All trays available with riser kit for easy installation on solid floor installations
- Anti-slip is available on all trays
- 10 year guarantee

Ultimate safety with anti-slip coating

Optional riser kits with easy 'push-fit' legs

Reduces bacteria and mould by up to 99.9%

Best in Class

What does Class C mean?

Kohler Anti-slip tray has achieved Class C for DIN 51097 – a barefoot ramp test. In testing the tray is fixed to the ramp and made wet and soapy. The tray is then inclined until the test subject slips.

The grip is given a classification depending on the angle of inclination of the slip. Class C is the highest classification. A tray must be inclined to a minimum of 24° with the test subject still standing.

On Kohler Anti-slip trays, test subjects were still standing at an incline of over 30°.

DIN 51097 Ramp test for barefoot		Ramp angle
	Class A	12°
	Class B	18°
	Class C	24°
	Kohler Anti-slip tray	30°

What John Michael Kohler saw in 1883 when he looked at a cast-iron horse trough was the bathtub that launched a global plumbing company. That pioneering spirit of ingenuity – the kind that sees a bathing revolution in a horse trough – has defined Kohler Co. from its earliest days. A visionary, John Michael Kohler understood the importance of innovative design and an uncompromising commitment to craft and quality. After four generations, we remain a family-owned company, with over 26,000 products and 13,000 patents to our name. Still leading the industry in innovation and design. Bolder than ever.

A KOHLER Experience®

Thank you.

If you'd like to learn more about KOHLER® and our complete product offering, we invite you to take a look at our website or stop by a displaying Kohler Showroom.
