

# STEEL BATHS Your complete guide

LUN PLUS

**Roca**

# Why Roca steel?

Thanks to the triple coating of a high gloss enamel in manufacture, buying a Roca steel bath offers the following benefits:

- Scratch, stain, impact, chemical, acid and UV resistant
- Heat conducting so keeps the water warmer for longer
- Long lifespan
- Hygienic as does not absorb odours and bacteria
- Easy maintenance as can be cleaned repeatedly without affecting finish

Additional benefits of Roca steel baths are:

- Strong as tested for loads up to 300kg
- Anti-slip options on some models makes them more suited to showering
- 100% recyclable
- Timeless designs
- 25 year manufacturers guarantee
- **ECO** options available that hold just 130 litres of water

## Which thickness?

The thickness of a steel bath, including enamel, can be referred to as its gauge. Our baths come in a choice of two gauges as follows:

- S** Standard Gauge 2mm
- SH** Super Heavy Gauge (Plus) 3-3.5mm\*

When you see the word 'Plus' in a product name it is a super heavy gauge bath.

Standard gauge baths will suit the requirements of most specifications. Super heavy gauge models may be more suitable for high usage environments as well as luxury applications.

\*All super heavy gauge models are 3.5mm thick, apart from Duo Plus and Duo Oval Plus which are 3mm.

# The models at a glance

1. Princess-N

2. Swing

3. Carla (including eco)

4. Carla Plus

5. Contesa (including eco)

6. Contesa Plus
