4iE® SMART WIFI THERMOSTAT

The right temperature.
The best tariff. Effortlessly.

Use the 4iE® Smart WiFi Thermostat to control DCM-PRO

DCM-PRO

Fastest to install, heated decoupling system

*Please visit warmup.co.uk for more information.

DCM-PRO

FEATURES

- **Self-healing decoupling layer**
- **Patent pending self-adhesive backing**
- **Functional with all UFH-compatible floor coverings**
- **Membrane designed to correlate with cable sizes**
- **Waterproof - tape required**

BENEFITS

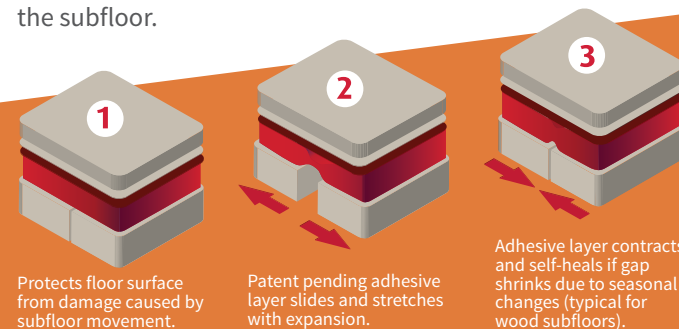

- **40% faster installation**
- **Easy to pour in self-leveller with no air pockets**
- **Protects floor from damage**
- **Easy to tile over**
- **Convenient sizing - easy to order**

The DCM-PRO's castellations are designed to protect the heating wire from the tiler's trowel, allowing for easy, safe and rapid tiling straight on top of the membrane. For protection of a pre-tiled floor, or when using carpet, laminate, engineered wood or vinyl, the open layout of the castellations allow for easy pouring and even spread of self-levelling compound, without the worry of any holes or air gaps.

PROTECTS FLOOR FROM DAMAGE

Rated as high performance, DCM-PRO is proven to protect tiled floors from cracking (ANSI 118.12:5.4).

Unlike traditional fabric-based decoupling layers which tear upon movement, the patent pending self-healing decoupling layer contracts and expands to deal with seasonal changes, preventing damage occurring from gaps and cracks in the subfloor.

DCM-PRO

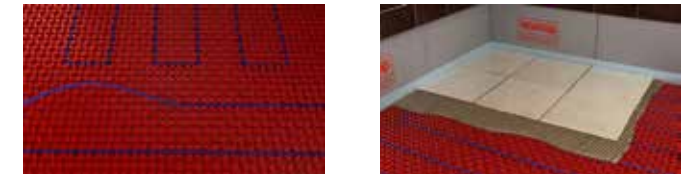

INSTALLS IN MINUTES

The self-adhesive backing attaches directly to subfloor - no need to mix additional tile adhesive or wait for it to dry.

EASY TO TILE OVER

Tile quickly and easily directly onto the system, which provides the perfect surface to lay tiles, with no risk of damage to the heater.

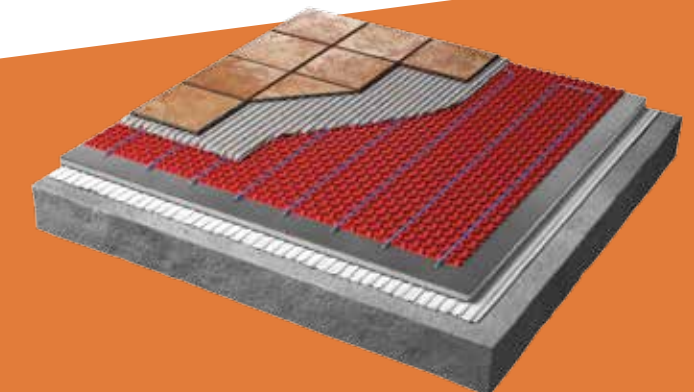

CONVENIENT SIZING

- 1m² of cable fits exactly 1m² of membrane
- Can be adjusted to increase or decrease coverage and power:

230 Watts per m² - based on 2 castellations

150 Watts per m² - based on 3 castellations (recommended)

115 Watts per m² - based on 4 castellations

DCM-PRO, the fastest to install, heated decoupling system

INTRODUCTION

The DCM-PRO is the fastest solution for the installation of a decoupling system in all areas, installing electric underfloor heating in minutes with less tile adhesive.

The patent pending self-adhesive feature of the DCM-PRO Mat acts as a self-healing decoupling layer, eliminating the need for additional fixings and laborious installation methods, significantly reducing both time and costs.

The pre-spaced channels on the mat also reduce time spent on measuring and calculating the correct spacing to output ratio for your project as they are made to correspond directly with the cable sizes.

To facilitate installation even further, the DCM-PRO Cable is designed to be highly-flexible, providing durability and maximum reliability and comes with a lifetime warranty when installed with the DCM-PRO Mat. As market-leaders in underfloor heating we can promise our premium quality product is guaranteed for the lifetime of your floor.
