MANUFACTURER'S WARRANTY	3 YEARS

The sleek and scratch resistant gloss black fascia sits neatly against tiling or modern panelling materials. When you approach the toilet, the Wave S3™ illuminates to display two interactive icons. A simple wave of the hand delivers a touch-free full flush or water-saving reduced flush. What's more, icons then inform you when flushing is taking place and when the cistern is refilling. The Wave S3™ also prevents another flush from being activated until the cistern has refilled. Finally, the plate has been designed and engineered in the UK by Dudley, the leading name in water-saving solutions and comes with a 3 year warranty.

EASY TO FIT
