**Totally
dependable.**

Welcome

We've been a leading player in the heating industry since 1850. By making dependable products backed by trusted service, our success is built on customer satisfaction. You can rely on us at every stage of your project: from design and tender to installation, commissioning, handover and beyond. Whatever the size of the application, we're always here to help.

Before any Potterton boiler leaves our factory, it must achieve a 100% pass rate throughout our rigorous testing programme. All our products use the latest, proven technology and represent energy efficient, environmentally friendly and easy-to-use home heating solutions.

We provide high quality service and technical support for the lifetime of the product. We work closely with our partners to promote environmental, social and economic sustainability, exceeding expectations and helping to meet carbon reduction targets.

Potterton – totally dependable.

Our commitment to you

Potterton can demonstrate our environmental credentials and our quality management systems through achieving the internationally recognised ISO 14001 and ISO 9001 standards.

We are fully committed to our company's Corporate Social Responsibility (CSR) policy, and we strive to work in a sustainable and decent way.

We are committed to operating an ethical business and quality assured supply chain that delivers exceptional customer satisfaction with class leading products and services.

We value our environment and are committed to minimising the carbon emissions in our workplace, products and throughout our supply chain.

We believe that investing in the health and welfare of our people is critical to our future success and long term sustainability.

We build partnerships at a local level by offering practical support such as work experience or training in schools, colleges, institutions, charities and local authorities.

Potterton delivers best value through reliable, energy efficient boilers, and excellent customer support and technical backup. Whichever boiler you choose, you can depend on Potterton.

Performance

We understand that consistent performance is vital. That's why we ensure all our products exceed customer needs – for capability, reliability and efficiency.

Service excellence

We're committed to delivering the highest standards of customer service possible. How? By supporting our customers every step of the way.

Engineering quality

We pride ourselves on offering great value solutions, but that doesn't mean we compromise on our technology, design and components.

Genuine parts

We stock parts for all our boilers for up to 10 years after they have stopped being made.

Customer support

Our responsive UK customer contact centre and nationwide network of Gas Safe registered engineers are here to help.

Sales support

Our dedicated teams understand the specific needs of the public sector and housebuilders.

Assure Combi

The Potterton Assure Combi is designed for social housing. Its many smart features make installation and maintenance faster, easier and more efficient.

**25kW and
30kW**

Outputs

29kg

Installer lift
weight

**Front access to
components**

Easier to service

Features and benefits

Features	Benefits
Outputs: 25kW and 30kW	To suit most property sizes
Compact cupboard fit	Can be installed discreetly
Lightweight	29kg lift weight
Front access to all components	Saves time when servicing, allowing for ease of maintenance and repair
Fully modulating and highly efficient	Boiler intelligently uses the right amount of fuel to meet the set central heating temperatures, saving money on fuel bills
Central flue	For ease of siting
Flueing options of up to 20m	Allowing greater flexibility of siting
Optional outdoor weather sensor available	Enhances system control and customer comfort
Ease of service	No special tools or replacement seals required for standard service
Pipes behind facility within boiler casing	Save time, space and money by piping behind within the footprint of the appliance
Clean aesthetic finish	Boiler casing hides system connections for cleaner finish
Built in drip tray	Protection against water ingress in extreme weather conditions
Optional Safety Assist available	Ability to protect vulnerable residents by locking controls
Vertical packaging	Allows for ease of access to all installation accessories from top of the packaging

Features and benefits

Features

Benefits

Outputs: 13kW, 16kW, 19kW, 25kW and 30kW	To suit most property sizes
Only 19.5kg installer lift weight	The lightest boiler available in UK**
Cupboard fit	Can be installed discreetly
Easy fit wall mounting bracket	Robust with a positive fix and audible lock so you know it's secure
One metre lead included	Easy to install and you don't need access to the control box
Top or rear central flue	For reduced boiler footprint and improved look
Simple fixing of rear flue	For easy and fail-safe flue fixing
No pump overrun or permanent live required	Saves time and money during installation, and less disruption for the house holder
Front and side access	Servicing is easier and quicker, and no special tools are required
Flueing options of up to 12m	Allowing for greater flexibility of siting
Vertical packaging	Allows for ease of access to all installation accessories from top of the packaging

** As at June 2014.

Promax Combi

A range of high efficiency combi boilers that are quick and easy to install in a wide range of homes. Flexible and reliable, each model offers built-in frost protection and flues that can be fitted almost anywhere.

**24kW to
33kW**

Outputs

Up to 20m

Flueing options

Up to 37%

Gas savings

*Based on XL load profile

Features and benefits

Features

24kW, 28kW and 33kW

Fully modulating and highly efficient

Compatible with Multifit GasSaver

Pre-plumbing jig

Flueing options of up to 20m

Optional stand off bracket

Separate CH & DHW selector dials

Robust hydraulic connections

Optional outdoor weather sensor available

Optional Offset Elbow available for centre flueing

Filling Loop included in the box

Vertical packaging

Benefits

A model for most sizes of property

Boiler intelligently uses the right amount of fuel to meet the set central heating and hot water temperature, saving money on fuel bills

Can give savings of up to 37% on gas for DHW

Pipe work can be pre-installed and the boiler added when the property is occupied

Allowing greater flexibility of siting

Allows pipes to be routed behind the boiler

Easy to use controls

Quality and reliability

Enhances system control and customer comfort

Allows replacement of boilers with a central flue without the need to drill a new hole

For ease of filling and topping up the system

Allows for ease of access to all installation accessories from top of the packaging

Promax System

Each of the five models are fully modulating and can be sited easily with flue lengths of up to 20m. Boilers are suitable for homes with a high demand for hot water.

**12kW to
32kW**

Outputs

Up to 20m

Flueing options

Up to 37%

Gas savings

Features and benefits

Features

12kW, 15kW, 18kW, 24kW and 32kW

Fully modulating and highly efficient

Compatible with Multifit GasSaver

Compatible with Megafluo Eco Solar Cylinder

Pre-plumbing jig

Flueing options of up to 20m

Optional stand off bracket

NOx 5 - best in class

Robust hydraulic connections

Optional Offset Elbow available for centre flueing

Vertical packaging

Benefits

A model for most sizes of property

Boiler intelligently uses the right amount of fuel to meet the set central heating temperature, saving money on fuel bills

Can give savings of up to 37% on gas for DHW

Greater fuel savings for hot water - all available from one manufacturer

Pipework can be pre-installed and the boiler added when the property is occupied

Allowing greater flexibility of siting

Allows pipes to be routed behind the boiler

Complies with the Code for Sustainable Homes

Quality and reliability

Allows replacement of boilers with a central flue without the need to drill a new hole

Allows for ease of access to all installation accessories from top of the packaging

Promax Ultra Combi

A range of high efficiency combi boilers with an excellent SAP 2012 seasonal efficiency rating, providing cost effective Building Regulations Compliance. The 40kW model delivers a higher domestic hot water flow rate for larger properties.

**24kW to
40kW**

Outputs

Up to 20m

Flueing options

**Front access to
components**

Easier to service

*Based on XL load profile 24 & 28, XXL for 33 & 40

Features and benefits

Features

24kW, 28kW, 33kW and 40kW

SAP 2012 seasonal efficiency figure of 89.1%

Service due indicator

Natural Gas and LPG ready

Front access to all components

Pre-plumbing jig

Flueing options of up to 20m

Optional Outdoor weather sensor available

Optional stand off bracket boiler

Optional Offset Elbow available for centre flueing

Filling Loop included in the box

Vertical packaging

Benefits

A model for most sizes of property

Easier, more cost effective Building Regulations compliance

Reminds your customer to ensure that the boiler is serviced

One boiler to suit both fuel types, no need for a conversion kit

Saves time when servicing

Saves time on installation

Allowing greater flexibility of siting

Enhances system control and customer comfort

Allows pipes to be run behind the boiler

Allows replacement of boilers with a central flue without the need to drill a new hole

For ease of filling and topping up the system

Allows for ease of access to all installation accessories from top of the packaging

Features and benefits

Features

Benefits

Outputs: 12kW, 15kW, 18kW, 21kW, 24kW	To suit most property sizes
Only 19.5kg installer lift weight	The lightest boiler available in UK**
Cupboard fit	Can be installed discreetly
Easy fit wall mounting bracket	Robust with a positive fix and audible lock so you know it's secure
One metre lead included	Easy to install and you don't need access to the control box
Top central flue	Easy replacement for existing boilers
No pump overrun or permanent live required	Saves time and money during installation, and less disruption for the householder
Front and side access	Servicing is easier and quicker, and no special tools are required
Wide choice of flue lengths, bends and accessories	For versatile siting
Vertical packaging	Allows for ease of access to all installation accessories from top of the packaging

** As at June 2014.

Promax Store

Designed to fit easily in a standard airing cupboard, the Potterton Promax Store is an integrated hot water storage and central heating boiler.

Up to
150L store

For high hot
water demand

Up to **20m**

Flueing options

Unique
roller system

Easier to install

Features and benefits

Features

Available in 90, 115 or 150 litre stores

Fully modulating and highly efficient

Unique roller system

Built-in two stage frost protection

Flueing options of up to 20m

Fully pumped sealed system

Domestic hot water priority system

7 day digital

Vertical packaging

Benefits

Meets the most demanding hot water requirements

Boiler intelligently uses the right amount of fuel to meet the set central heating temperature, saving money on fuel bills

Easier to move and install

Can be installed in basements or garages

Allowing for greater boiler siting flexibility

No tanks in the loft required

Plenty of hot water, whenever you need it

Factory fitted for quicker installation easy to use programmer

Allows for ease of access to all installation accessories from top of the packaging

Controls and Accessories

These accessories are available for the Promax Store

Maximum equivalent horizontal length	m	15	15	15

Flue solutions

Our flue kits now come with positive screw fixings for all connections and are available in a choice of lengths to reduce the need for onsite cutting. By popular demand we offer a choice of colours for the terminals to match existing rainwater systems.

Maximum recommended flue lengths

Potterton Combi / System / Store	A (60/100 Concentric)	G (80/125 Concentric)	N (80/80 Twin Pipe)
Horizontal	10	20	15
Vertical	10	20	15
Potterton Heat	B (70/110 Concentric)	P (80/80 Twin Pipe)	
Horizontal	4	75	
Vertical	4	75	

Note - for more information on equivalent flue lengths when using flue bends, please refer to the relevant installation instruction.

46	Pitched roof terminal adaptor kit	White		60-80mm	5121792
47	Single flue terminal (air only)			80mm	5121791

Terminal position with minimum distance

	(mm)
A ¹ Directly below an opening, air brick, opening windows etc	300
B ¹ Above an opening, air brick, opening window etc	300
C ¹ Horizontally to an opening, air brick, opening window etc	300
D ² Below gutters, soil pipes or drain pipes	25
E ² Below eaves	25
F ² Below balconies or car port roof	25
G ² From a vertical drain pipe or soil pipe	25
H ² From an internal or external corner	25
I Above ground, roof or balcony level	300
J From a surface or boundary line facing a terminal	600
K From a terminal facing a terminal (Horizontal flue)	1200
K From a terminal facing a terminal (Vertical flue)	600
L From an opening in a carport (e.g. door, window) into the dwelling	1200
M Vertically from a terminal on the same wall	1500
N Horizontally from a terminal on the same wall	300
R From adjacent wall to flue (vertical only)	300
S From an adjacent opening window (vertical only)	300
T Adjacent to windows or openings on pitched and flat roofs	600
U Below windows or openings on pitched roofs	2000

- In addition, the terminal should be no nearer than 150mm to an opening in the building fabric formed for the purpose of accommodating a built-in element such as a window frame.
- Only ONE 25mm clearance is allowed per installation. If one of the dimensions D, E, F, G or H is 25mm then the remainder MUST be as B.S.5440-1.

IMPORTANT:
If fitting a Plume Displacement Flue Kit, the air inlet must be a minimum of 150mm from any opening windows or doors

*This can be reduced to 25mm by using item 6/7/8 flue deflector.

Case study.

Potterton Promax is boiler of choice for Doncaster Social Housing overhaul

As part of a complete refurbishment of social housing in Doncaster, St Leger Homes was looking for a strategic partner to help it cost-effectively install new heating systems in thousands of council-owned properties.

Potterton was able to deliver a value-for-money solution to St Leger Homes which simplified installation, repair and maintenance and supported them with market leading aftersales care from its award-winning service division.

St Leger Homes has installed almost 4,000 Potterton Promax Combi boilers in the last three years. They have replaced ageing combi boilers, like for like, and they have also been used to replace back boilers.

David Norman, Mechanical and Electrical Manager at St Leger Homes said:

"We look after 21,000 homes in the Doncaster area, and as part of the Decent Homes refurbishment scheme, a large number of these properties required improvements to their heating system. With the volume of units involved and the associated installation costs to fit each one, we needed a strategic partner who would be able to offer value for money as well as help us get the boilers installed quickly and efficiently.

To really cement the strategic partnership, Potterton has excelled in its aftersales care and support for us. Our installers were given free technical training to ensure each boiler that goes into one of our properties works at its best and that tenants are given the right information about how to use their new heating system to reduce their energy bills. We have also been given direct access to the company's Customer Support team. This is really important for us as we have target times to respond to maintenance issues, so if there's a boiler fault that requires an engineer and it's under warranty, we can call before 3pm and get someone out the next day - guaranteed."

Bill Jones, Sales Director, Potterton, said:

"Our partnership with St Leger Homes really shows off our strengths in the social housing market. We have reliable products, at the right price, all backed up with a service that leads the industry and makes our customers feel valued and supported. It's about making life easier for specifiers, service providers and tenants alike."

Newdesign and whole life costing.

Newdesign

Our Newdesign team provides a full heating system design service for residential developments that incorporate our heating and hot water products.

Design layouts are generated using the latest computer software and can be issued in either hard copy or electronic format.

Newdesign is able to work with SAP assessors and other technical parties to help you meet your carbon or energy targets.

Benefits at a glance

- Full heating system design service
- Available free of charge to Potterton and Heatrae Sadia customers
- Bespoke service tailored to each individual development
- Newdesign works with SAP assessors
- All system designs fully indemnified
- Database of over 40,000 house type designs

Whole life costing

It pays to plan ahead. Our whole life costing model helps you to analyse all the costs and revenues associated with installing a Potterton boiler. Then you can set accurate, realistic budgets for its operation, maintenance and repair.

Talk to your local representative for more information

Support you can depend on

Potterton is part of Baxi, meaning it benefits from our extensive customer support services. Whatever you need, our expert support is never more than a phone call away.

Customer support

We will provide expert support, whenever you need it, from the very start of your project, through installation and commissioning, and then for the lifetime of the boilers.

Dedicated, knowledgeable specification and new build teams

UK customer contact centre and a nationwide network of Gas Safe registered engineers

Technical helpline provides expert technical support and advice

Opening hours

Monday – Friday, 8.00am – 6.00pm
Weekends and bank holidays,
8.30am – 2.00pm
We are closed on Christmas Day
and New Year's Day.

Genuine parts

Baxi Genuine Parts offers an extensive range of components, consumables, safety devices and tools.

We can provide everything you need for installation, maintenance and annual servicing.

Available through a nationwide network of approved stockists

Lifetime support for Potterton products

Parts available for 10 years after manufacture of boilers ceases

Find a genuine part or your nearest stockist: www.baxigenuineparts.co.uk

Training

We run courses at training centres throughout the UK. Our expert trainers will tailor the courses to suit your individual requirements, so you can install, service and maintain Potterton boilers with confidence.

Free of charge hands-on product training

Expert trainers, all accredited, experienced former heating engineers

Training centres across the UK

On-site training and support can be arranged

To book your place on a Potterton training course call:
0845 600 7401

Carbon Monoxide

Safety is our highest priority, so we recommend the use of an audible carbon monoxide alarm whenever a boiler, or other carbon burning appliance, is installed.

Make sure it is marked with British Standard EN 50291 and the Kitemark

Fitting a carbon monoxide alarm is not a substitute for an annual service
