CLAS HE SYSTEM EVO 24 EU

Energy label for heating system showing a radiator icon and a boiler icon, both with an 'A' energy class label.

Feature selection panel with icons and checkboxes:

- + Solar panel icon:
- + Water tank icon:
- + Control panel icon:
- + Boiler icon:

Energy scale for heating system with a radiator icon. The scale ranges from A+++ (green) to G (red). A black arrow points to the 'A' class.

Energy scale for water tap with a tap icon labeled 'XL'. The scale ranges from A+++ (green) to G (red). A black arrow points to the 'A' class.

## FICHES

For preferential space heaters and preferential combination heaters, element of the fiche for a package of space heater, temperature control and solar device and a package of combination heater, temperature control and solar device, respectively, indicating the seasonal space heating energy efficiency of the package offered.

<b>Seasonal space heating energy efficiency of the appliance</b>	<b>'I' +93 %</b>
<b>Temperature control</b>	<b>V +3 %</b>
<b>Seasonal space heating energy efficiency of package</b>	<b>+93 % = A</b>

*The energy efficiency of the package of products provided for in this fiche may not correspond to its actual energy efficiency once installed in a building, as the efficiency is influenced by further factors such as heat loss in the distribution system and the dimensioning of the products in relation to building size and characteristics.*

For preferential combination heaters, element of the fiche for a package of combination heater, temperature control and solar device indicating the water heating energy efficiency of the package offered

<b>Water heating energy efficiency of combination heater</b>	<b>'I' 100 %</b>
<b>Declared Load Profile</b>	<b>XL</b>
<b>Water heating energy efficiency of package under average climate</b>	<b>+100 % = A</b>

*The energy efficiency of the package of products provided for in this fiche may not correspond to its actual energy efficiency once installed in a building, as the efficiency is influenced by further factors such as heat loss in the distribution system and the dimensioning of the products in relation to building size and characteristics.*
