

The image shows a detailed energy label for an Alpha E-Tec 25R boiler. At the top left is the European Union flag. To its right, the word "ENERG" is written in large blue letters, with "енергия · ενεργεια" below it. Further right are four circular icons containing the letters Y, IJA, IE, and IA. Below this header, the brand name "Alpha" is written in a stylized font, with "HEATING INNOVATION" underneath. To the right of the brand name is the model "E-Tec 25R". Below the brand name is a small icon of a radiator. The central part of the label features a vertical energy scale with seven horizontal bars of increasing length, labeled A+, A+, A, B, C, D, E, F, and G from top to bottom. The A+ bar is highlighted in green, and a black arrow points to it from the right, indicating the boiler's energy class. Below the energy scale is a sound power level icon (a house with a speaker) and the value "52 dB". To the right of this is a large box containing the text "24 kW". At the bottom left of the label is the year "2015", and at the bottom right is the code "811/2013".
