

PVC Elbows, Tees & End Caps

Black

Flexseal PVC Elbows and Tees connect all common above ground domestic drain, waste and vent pipe systems. Manufactured from a durable thermoplastic compound, they come in four sizes and can fit all common pipe materials including cast iron, steel, plastic, copper and lead.

Flexseal PVC End Caps are ideal for capping pipe ends, cleanouts and open test pipes and are suitable for above ground or underground use on cast iron, steel, copper or plastic pipe systems.

The convex face allows the cap to withstand greater pressure for testing purposes and minimises ballooning.

Product specification for Flexseal PVC Black Elbows, Tees & End Caps

Product Code	See over
Description	Thermoplastic Black Plumbing Elbows, Plumbing Tees and End Caps
Size Range	Elbows and Tees: 41 - 116mm; End Caps: 43 - 364mm
Material	Flexible PVC (Polyvinylchloride)
Steel	1.4310 (301) Stainless Steel, except for couplings marked * - 1.4301 (304) Stainless Steel or 1.4401 (316) Stainless Steel (on request)
Pressure Rating	0.5bar, 7.25psi
Temperature Range	-34°C to 60°C
Tightening Torque	6Nm
Standards	BBA Certificate No. 91/2615

Global leaders in flexible couplings,
drainage & plumbing systems

Benefits

- Ideal for working in confined spaces e.g. under a bath or shower tray
- Extra length and flexibility of the Elbows and Tees provides compensation for shortened or misaligned pipes
- Quick, versatile and easy to use solution for many domestic drain, waste and vent plumbing problems
- No special tools required to install Tees, Elbows or End Caps
- Ideal for repairs, providing a watertight seal
- Can be installed onto any pipe material

Applications

- Tees and Elbows are used to replace fittings cut out at the joint during alteration or repair
- Can be installed onto all common above ground household drain, waste and vent pipes
- Make new connections to existing pipe work
- End Caps are ideal for permanent clean out or temporary protective cap against ingress of dirt, and can be used for air testing when a nipple is applied
