

Designer Radiators

March 2020 Edition 1

Europe's leader in sustainable indoor climate comfort solutions

We manufacture and distribute globally from over **20** locations to customers in **50+** countries.

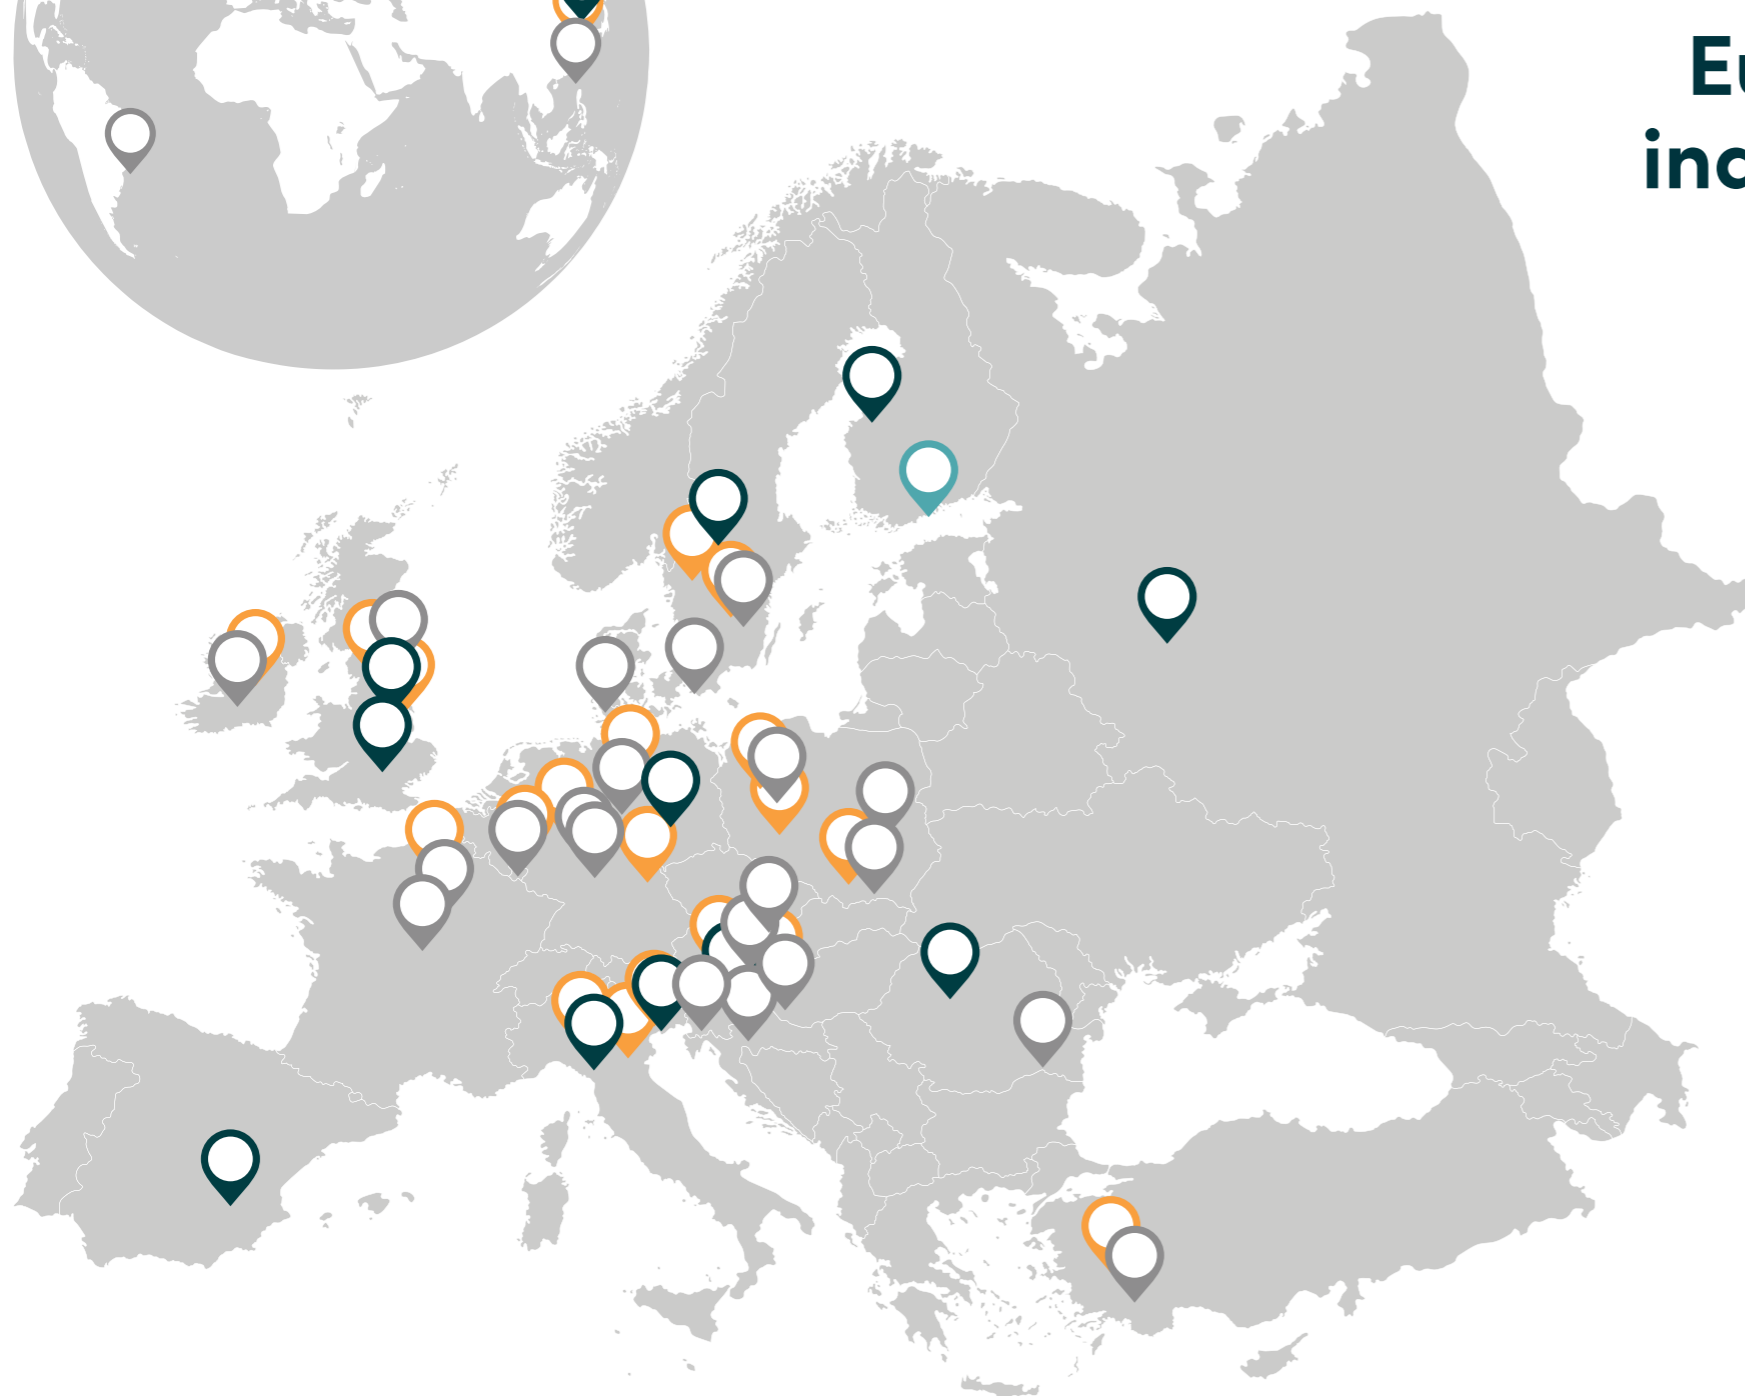

Comfort delivered is our promise to all our stakeholders. It is all about our dedication and our ability to deliver. About listening and responding to the needs of our personnel, our customers and end-users.

Purmo Group delivers comfort by doing things smarter, by always moving forward and by staying ahead of the competition.

We deliver comfort by:

- Enabling our people to flourish, ensuring their safety at all times
- Designing inspiring products that are accessible to the many
- Always placing our customers at the centre
- Keeping an eye on the future to ensure the sustainability of our business

We are Purmo Group - Comfort delivered.

Our promise

Comfort delivered

The indoors. The place where we spend so much time – learning, sleeping, relaxing, sharing. It's where we live. That's why a healthy and comfortable indoor climate is so important. But in a world facing climate challenges, unprecedented population growth and a need to use resources better, ensuring sustainability is paramount.

Committed to innovation, we take a system and solution approach to delivering optimal heating offers the highest levels of comfort and energy efficiency. With our complete range and expert knowledge, we can help you find exactly the right solution. So, let's work together and create innovative solutions that will meet tomorrow's indoor climate challenges today. Let's advance indoor climates as we know them.

Let's create the great indoors.

Comfort

delivered by ...

Our trade brand house

Our commercial brand house is an overview of our vision and customer promise. The four brand pillars demonstrate how we plan to achieve this and define the change we want to drive.

Improve efficiency

Optimising energy efficiency through system accuracy

Better integration

Let's **integrate solutions** in innovative systems for better performance

Work smarter

Let's work together and **work smarter**

Reduce footprint

Let's focus on the full product life cycle and **reduce impact on our climate**

Add a little colour to your life

A little bit of colour can magically brighten up a room and what better way to complement an interior decor than with a colourful radiator? We offer an extensive range of colours for our Slieve, Adagio, Forza, Plaza, Topaz and Pearl ranges and deliver within four weeks of ordering.

Colours for style and choice

Selected to complement the stylish design of our radiators, our colours reflect the beauty of contemporary trends like a breath of warm air.

From our sleek Champagne to our shimmering Matt Charcoal, our colours are extraordinary.

Our palette of colours just for you

If you're looking for something more colourful, our bespoke service is just the answer you're looking for. We give you the choice of any RAL colour, which means over 180 possibilities! Whether it's a bright yellow or a trendy teal, we deliver with a 4-week lead time.

Coloured radiators held in stock

We understand that sometimes time is of the essence. To help you, we stock a selection of the most popular sizes and colours.

LST

The Purmo LST Radiator consists of a panel radiator and a highly durable anti bacterial powder coated outer casing, manufactured from 1.2mm steel. The outer casing prevents contact with the hot surface of the radiator and also covers pipework. Surface temperatures are below 43°C with water inlet temperatures up to 82°C in accordance with NHS Estates Guidance Note 'Safe Hot Water and Surface Temperatures, 1998'. The robust outer casing can easily be removed to allow access for regular cleaning, maintenance and decorating.

The Purmo LST Radiator is particularly favoured for installation in nurseries, hospitals, nursing homes, sheltered housing and high-risk areas in the home.

- Available in three heights **572mm, 672mm and 872mm**
- Available in lengths from **420mm to 2000mm**
- Available as single panel, single convector (T11) and double panel, double convector (T22)

Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Full 10-year warranty for both the casing and radiator
- Manufactured and tested to BS EN 442

emitter height - B (mm)	300	400	600

Important: It is advisable to leave a further 5mm clearance above any final floor covering to allow for easy fitting and removal.

Control Options

A range of Purmo thermostatic radiator valves is available enabling the temperature of individual rooms to be automatically and precisely controlled.

Close Coupled Thermostatic Radiator Valve

The close coupled TRV Kit is suitable for the BOE connection, offering a choice of positions for both the valve body and the sensor head. The kit allows the thermal sensing head of a Purmo TRV to be mounted directly on the top left or top right of the casing. The point of fixing in the casing side has been semi-punched to allow it to be easily knocked out. The body of the valve is fitted to the emitter, and is coupled to the sensor head by means of a flexible capillary lead.

- The Universal Kit comprises:
- 1 TRV head & limit pins
 - 1 ½" 15mm straight body
 - 1 LST capillary unit
 - 1 Head locating body
 - 1 ½" 15mm Fullflow straight lockshield valve
 - 2 Integration elbows

To Order: UNICCKTCP

Direct Fit TRV Kit (Cannot be used with 420mm wide radiator)

The Direct Fit TRV Kit is suitable for TBOE connection only, and allows a Purmo TRV body to be fitted directly to the emitter with the thermostatic head projecting through the casing.

- The Kit comprises:
- 1 Horizontal angle TRV body
 - 1 TRV head
 - 1 Extension adaptor
 - 1 Plastic bush
 - 1 Matchmaster lockshield valve

To Order: DIRECTFIT

DIRECT FIT TRV

Remote Sensor

The Remote Sensor is suitable for BOE connections only. This allows the fitting of a Purmo TRV inside the casing with the sensor being located up to 5m away.

To Order: TRVRSHEAD5 (5m) / TRVRSHEAD2 (2m)

REMOTE SENSOR

Remote Adjuster

The Remote Adjuster enables the Purmo TRV head / sensor to be wall mounted up to 5m away from the radiator and is suitable for both TBOE and BOE connections.

To Order: TRVADJHEAD5 (5m) / TRVADJHEAD2 (2m)

REMOTE ADJUSTER

COMPLA HORIZONTAL

Compla Horizontal is a premium panel radiator. Stylish and modern, with the technological benefits of a Compact radiator, Compla Horizontal gives the perfect combination of design appearance and performance.

- Available in four heights **300mm, 400mm, 500mm and 600mm**
- Available in nine lengths from **400mm to 2000mm**
- Available as single panel, single convactor (T11) and double panel, double convactor (T22)

Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Full 10-year warranty
- Manufactured and tested to BS EN 442

Suitable for Bottom Opposite End (BOE), Top Bottom Opposite Ends (TBOE) and Top Bottom Same End (TBSE). 4 x 1/2" BSP tappings.
All Compla radiators: Test Pressure 13 bar. Max operating pressure 10 bar.

COMPLA VERTICAL

Compla Vertical has a clean minimalist feel, a premium alternative to a traditional panel radiator. Available in a variety of sizes. Easy to clean, robust and comes with pre-fitted curved side panels for easy installation.

- Available in two heights of **1800mm** and **1950mm**
- Available in four lengths from **300mm** to **750mm**
- Available in **Type 22** only

Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Full 10-year warranty
- Manufactured and tested to BS EN 442

Mounting Details

Ligna Horizontal T11 - Water Content (L)				
Radiator height (mm)	300	400	500	600
Water content per metre length	1.50	2.20	2.90	3.40

Ligna Horizontal T22 - Water Content (L)				
Radiator height (mm)	300	400	500	600
Water content per metre length	3.20	4.20	5.20	6.10

Ligna Horizontal T11 - n-Coefficients				
Radiator height (mm)	300	400	500	600
n-Coefficient	1.2820	1.2824	1.2827	1.2831

Ligna Horizontal T22 - n-Coefficients				
Radiator height (mm)	300	400	500	600
n-Coefficient	1.3000	1.3098	1.3197	1.3295

4 x 1/2" BSP tappings. Suitable for Bottom Opposite End (BOE), Top Bottom Opposite Ends (TBOE) and Top Bottom Same End (TBSE).

All Ligna radiators: Test Pressure 13 bar. Max operating pressure 10 bar.

LIGNA VERTICAL

Ligna Vertical is a modern twist on a traditional panel radiator, with a lined effect adding style to substance. Available in a variety of sizes. Easy to clean, robust and comes with pre-fitted curved side panels without compromising top-quality performance.

- Available in two heights of **1800mm and 1950mm**
- Available in four lengths from **300mm to 750mm**
- Available in **Type 22 only**

Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Full 10-year warranty
- Manufactured and tested to BS EN 442

6 Tap Radiator. 4 x 1/2" BSP + 3/4" central connection. Can be installed BOE, TOE, central both top and bottom.
All Ligna Vertical Radiators: Test Pressure: 8 bar Max Operating Pressure: 6 bar

SLIEVE

A popular choice amongst households, the Slieve with its smooth front panel combines designer style with exceptionally high heat outputs. Available in horizontal and vertical models, Slieve complements a range of interiors without compromising on performance.

Horizontal

- Available in five heights from **288mm to 723mm**
- Available in ten lengths from **500mm to 2000mm**
- Available in 5 types (H10, H11, H20, H21 and H22)

Vertical

- Available in three heights from **1600mm to 2000mm**
- Available in nine lengths from **288mm to 868mm**
- Available in type **V10 and V20**

Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Available in our 9 colours and in a large range of RAL colours
- Full 10-year warranty
- Manufactured and tested to BS EN 442

Slieve single horizontal in matt charcoal

Slieve Horizontal - Single Panel H10 & Single Panel Single Convector H11				
Radiator height (mm)	433	505	578	723
Water content (L/m)	4.01	4.8	5.61	6.84
Fin height (mm)	360	433	505	650

Slieve Horizontal - Double Panel H20, Double Panel Single Convector H21 & Double Panel Double Convector H22					
Radiator height (mm)	288	433	505	578	723
Water content (L/m): H20, H21	4.67	6.31	7.80	9.31	12.04
Water content (L/m): H22	4.90	7.31	8.50	9.71	12.21
Fin height (mm)	288	360	433	505	650

Note: the distance between the connection centres equals the length of radiator.

Slieve Vertical - Single Panel V10			
Radiator height (mm)	1600	1800	2000
Water content per element/tube (L)	0.95	1.03	1.16

Slieve Vertical - Double Panel V20			
Radiator height (mm)	1600	1800	2000
Water content per element/tube (L)	1.89	2.13	2.36

Vertical Slieves have a factory fitted centre baffle as standard in the bottom header for Bottom Opposite End (BOE) installation only. Horizontal Slieves are supplied without baffles and cannot be installed Top Bottom Same End (TBSE). All tappings 1/2" BSP.

All Slieve Radiators: Test Pressure: 5.2 bar Max Operating Pressure: 4 bar

ADAGIO

Adagio goes beyond a traditional column radiator with its flat panels in 35mm and 70mm widths. Available in horizontal and vertical designs, its clean lines and sleek finish guarantees style in any room. Choose from single or double columns.

Adagio 35 - Horizontal

- Available in one standard height of **600mm**
- Available in five lengths from **630mm to 1995mm**
- Available in **single and double** flat columns

Adagio 35 - Vertical

- Available in one standard height of **1800mm**
- Available in four lengths from **420mm to 630mm**
- Available in **single** flat column only

Adagio 70 - Vertical

- Available in two heights from **1800mm and 2000mm**
- Available in nine widths from **320mm to 840mm**
- Available in **single and double** flat columns

Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Available in our 9 colours and in a large range of RAL colours
- Full 10-year warranty
- Manufactured and tested to BS EN 442

FORZA

Forza combines a traditional look with innovative technology. Sleek and classic in its design, this multi-column radiator comes with double, triple or quadruple columns.

Horizontal

- Available in four heights from **300mm to 750mm**
- Available in seven lengths from **552mm to 1610mm**
- Available in **2, 3 and 4 columns**

Vertical

- Available in two heights of **1800mm and 2000mm**
- Available in three lengths from **332mm to 598mm**
- Available in **2 and 3 columns**

Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Available in our 9 colours and in a large range of RAL colours
- Supplied with 1/2" BSP flow diverter to reduce "warm up" time when installed Bottom Opposite End (BOE)
- Full 10-year warranty
- Manufactured and tested to BS EN 442

The Adriana is supplied with a power cable 800mm long. Rated IPX4 for use in zone 2.

Adriana in polished stainless steel

Accessories

Towel Warmer Options - Electrical Elements

The Topaz, Pearl and Crystal can be fitted with an electrical element which allows you to use the rail as an electric towel warmer in the summer when the central heating is off. With their lower energy requirement towel warmers are efficient, economical and provide flexibility, convenience and comfort at little added cost. Thermostatic elements provide an adjustable temperature control when required. All electric elements are covered by a 2-year warranty.

General specification

Material & Finish

Our radiators are manufactured from high quality steel, and are finished with Epoxy Polyester powder paint. Every radiator undergoes an intensive pre-treatment process to protect against rust.

Quality

Our radiators are manufactured to ISO9001 Standards, achieving EN442 compliance and every product undergoes rigorous testing and quality control before they leave our factory.

Packaging

Our radiators are supplied either in a heavy-duty reinforced cardboard box or wrapped in heavy duty polythene with top and bottom polystyrene box ends.

Safety Precautions

Radiators are hot when in use, and as such, present a risk of burns to users on prolonged contact. The temperature of a radiator is dependent on the temperature of the system water, as set by the system installer or user. Installers and users should ensure that those who may come into close

proximity to hot radiators are aware of the risk of burns. Installers and users should take all necessary steps to minimise the risks of burns.

If the risk is significant, consideration should be given to installing low surface temperature radiators, or to placing guards in front of the radiators.

Fixings

For the correct installation of radiators it is essential that the fixing of the radiator is carried out in such a way that it is suitable for intended use AND predictable misuse. A number of elements need to be taken into consideration including the fixing method used to secure the radiator to the wall, the type and condition of the wall itself, and any additional potential forces or weights that may happen to be applied to the radiator, prior to finalising installation.

IN ALL CASES IT IS STRONGLY RECOMMENDED THAT A SUITABLY QUALIFIED PROFESSIONAL INSTALLER OR SIMILAR TRADESPERSON CARRIES OUT THE INSTALLATION.

PLEASE NOTE: The fixing materials provided are only intended for installation on walls made of solid wood, bricks, concrete or on timber-frame stud walls where the fixing is into the timber. All walls being considered should have no more than a maximum of 3mm wall

finishing. For walls made of other materials, for example hollow bricks, please consult your installer and/or specialist supplier.

ONCE AGAIN, IF YOU ARE UNSURE, IT IS STRONGLY RECOMMENDED THAT A SUITABLY QUALIFIED PROFESSIONAL INSTALLER OR SIMILAR TRADESPERSON CARRIES OUT THE INSTALLATION.

Application

Most PURMO products are for use on 2 pipe pumped indirect domestic and commercial central heating installations, with a maximum working temperature of 100°C. The system should be designed in accordance with BS EN 12828:2003 or BS EN 12831:2003 as appropriate, with particular care taken to avoid air entry or water discharge.

We do not recommend the use of single feed indirect cylinders, as the possibility of aeration due to water interchange may lead to corrosion. The installation work must be carried out in accordance with recognised good practice, and precautions taken to avoid contamination which could lead to corrosion.

If a corrosion inhibitor or other water treatment is to be used, the Manufacturer's Instructions must be strictly followed.

The recommendations of BS 7593, Code of Practice for treatment of water in domestic hot water central heating systems, should be followed where appropriate.

When fitting any heat emitter in an extremely high humidity environment (for example a swimming pool area or sports changing facility) products manufactured from steel should be avoided.
